Ideation Phase
Brainstorm & Idea Prioritization

Date	21-10-2026
Team ID	23KD1A0592
Project Name	Indoor Gardening Services Management (IGSM)
Maximum Marks	4 Marks

Brainstorming and Idea Listings:

Problem Identification

Traditional	Manual	Cons
Indoor gardening service requests are handled through emails or verbal communication.	There is no centralized system to track request status, and no defined ownership or accountability.	Delays in response and completion, with no SLA tracking or access control.

Brainstormed Features

Idea - 1	Idea - 2	Idea - 3
Service request submission through a Catalog Item / Record Producer.	Custom request table capturing plant type, service type, priority and description.	Role-based access control using roles, groups and ACLs.
Idea - 4	**Idea - 5**	**Idea - 6**
Automated approval, technician assignment and notifications using Flow Designer.	Response and completion SLA tracking on every request.	Business Rule and Client Script validations (default priority, mandatory description).

Key Objectives

- Provide a single request portal for indoor gardening services.
- Ensure timely response and completion using SLAs.
- Control access using roles and ACLs.
- Reduce manual follow-ups.
- Improve transparency for requesters and technicians.

Implementation Map

Cannot Implement	Use of 3rd Party	Complex Implementation	Easy to Implement
• Integrations with external vendors • Advanced scripting	• None required; the solution uses native ServiceNow low-code features	• Flow Designer automation (approval, assignment, notification) • SLA configuration • ACL security	• Custom request table • Record Producer • Business Rule (default priority) • Catalog Client Script
